

Freestanding appliances

2009/2010

BOSCH

Invented for life

“It has always been an unbearable thought to me that someone could inspect one of my products and find it inferior in some way. For that reason I have consistently tried to produce products which can withstand the closest scrutiny – products which prove themselves to be superior in every respect.”

Robert Bosch 1861-1942

Designed for simplicity.

To help you choose the right Bosch appliance for your needs we have divided our appliances into three groups.

Logixx

Our premium range, with exceptional cutting-edge features and extras. Bosch Logixx machines offer electronic controls, and innovative features such as clear text displays and metal touch controls. The range includes extra large capacity washing machines and super-efficient tumble dryers, beautiful refrigeration products with a wealth of advanced food preservation technology, and the world's most powerful and economical dishwashers.

Exxcel

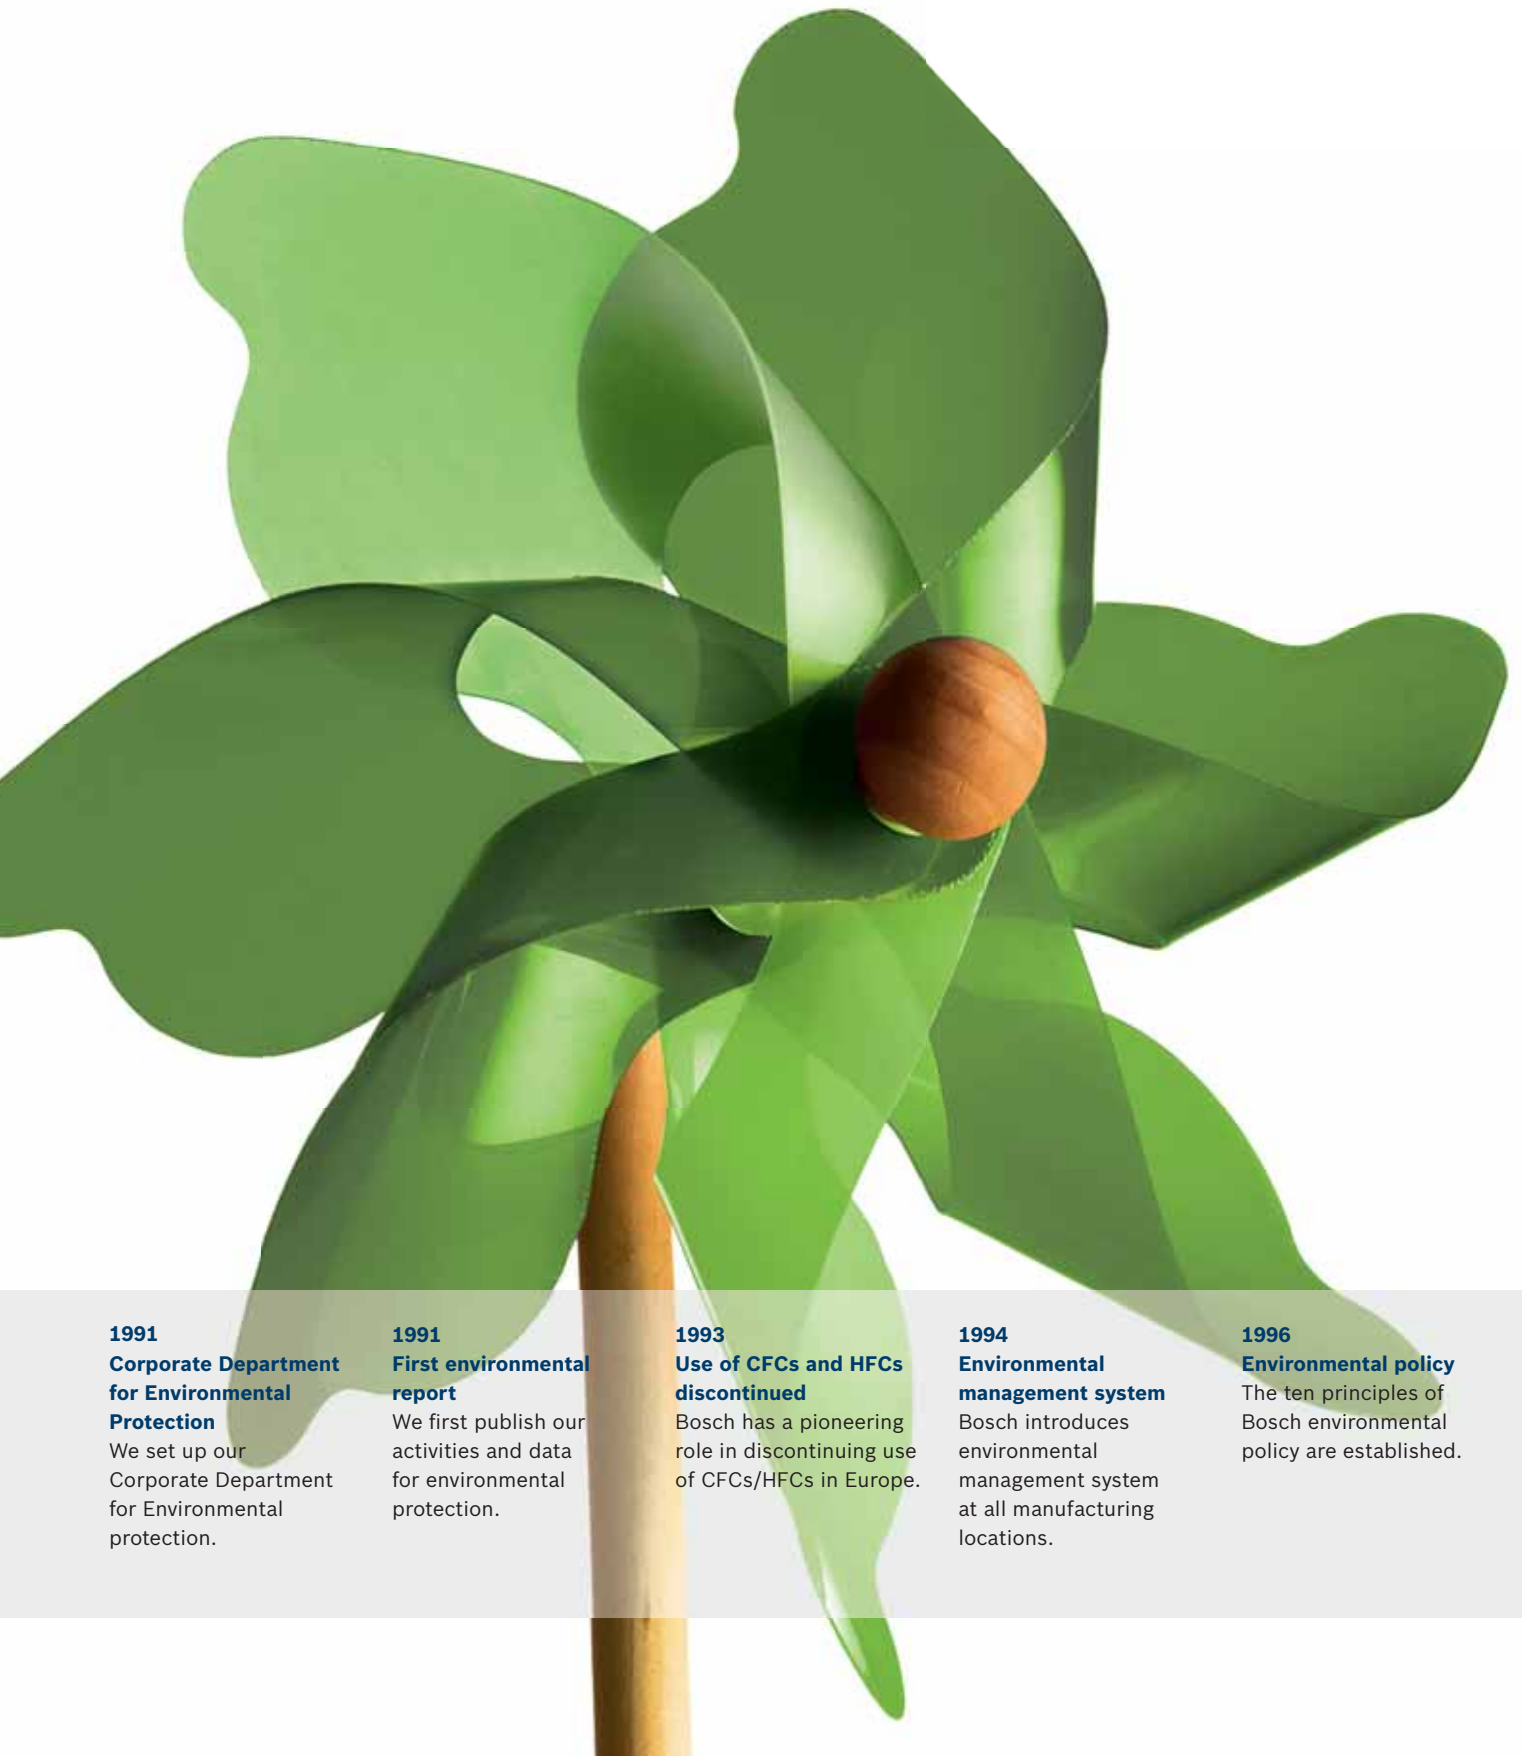

Mid-range models with a broad range of extra features and benefits. Large easy-to-use LED displays are common and selected products offer electronic controls. You will find large capacity washing machines and tumble dryers; dishwashers that can wash up to 13 full place settings, and refrigeration models that mean you never have to worry about defrosting your fridge or freezer again.

Classixx

Simple practical models offering Bosch build quality and value for money. Straight-forward, brilliantly easy to use, and with the highest quality materials used throughout, our Classixx range of appliances offer great home laundry, dishwashing, refrigeration and cooking solutions on a budget, but without compromise.

Green thinking – Bosch and the environment.

Because we believe you should never have to sacrifice excellence
to embrace the planet we live on...

1991
Corporate Department
for Environmental
Protection

We set up our Corporate Department for Environmental protection.

1991
First environmental
report

We first publish our activities and data for environmental protection.

1993
Use of CFCs and HFCs
discontinued

Bosch has a pioneering role in discontinuing use of CFCs/HFCs in Europe.

1994
Environmental
management system

Bosch introduces environmental management system at all manufacturing locations.

1996
Environmental policy

The ten principles of Bosch environmental policy are established.

Our environmental pledge

We set ourselves very strict guidelines, and in the majority of cases these exceed statutory regulations. This environmentally friendly approach is adhered to throughout the entire design and manufacturing process. Wherever possible we use recyclable plastics, and label all plastic parts so they can be easily sorted and disposed of in an environmentally friendly manner. We make considerable energy savings through heat recovery and energy supplied on demand, and we avoid harmful emissions and effluents by using effective filtering and purification systems. You can rest assured that when we are developing new appliances to give you maximum performance and maximum freedom we are both keeping pace with your demands and meeting our principles of protecting the environment.

Fridges and freezers

Have you ever thought how much energy your fridge and freezer consume? Running 24 hours a day, 365 days a year, they never stop using power. Bosch refrigeration products are among the most energy efficient available. In fact, our most energy efficient machines use at least 25% less energy than other A rated products, some up to 50% less. That's good for the planet, and good for your pocket. In fact, for each model listed, we have indicated the likely running cost based on an average 12p per kWh so that you can see how much money you can save by choosing Bosch over a less energy-efficient brand. Of course, all our refrigeration products are completely CFC and HFC free – gases that cause lasting damage to the earth's ozone layer.

Washing machines and tumble dryers

As our washing machines become ever more energy-efficient, their washing performance just keeps improving, thanks to intelligent technology. All our machines automatically adjust the amount of water and electricity needed for each wash keeping usage to a minimum and most of our dryers can assess temperature differences helping to ensure no energy is wasted on already dry clothes. Our new EcoLogixx 7 tumble dryer is a marvel of energy-saving technologies. It actually uses 40% less energy than is required for an A energy efficiency rating.

Dishwashers

Many people are surprised to hear that you use a lot more water washing up by hand than a dishwasher uses. The new Bosch ActiveWater dishwashers are the most economical in the world*, because they get more out of every drop of water, and so make a particularly effective contribution to environmental protection. Bosch Logixx ActiveWater dishwashers use as little as 10 litres of water per wash, compared to an average of 50 litres required to wash a similar load by hand. Our state-of-the-art energy saving technologies ensure that our dishwashers only use the exact amount of water and heat required, which means that a Bosch Logixx ActiveWater dishwasher will save you, and the environment, about 11,000 litres of water and over 700kWh of electricity annually.

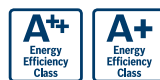

ActiveWater

Energy efficiency labelling scheme

To help you choose the most energy efficient appliances, the EU has introduced an energy-rating scheme and all appliances must display an EU Energy Label. The most efficient rating is 'A' and the least efficient is 'G'. All Bosch washing machines and dishwashers have an A rating for wash performance, and all Bosch washing machines, dishwashers, fridges and freezers are rated A for energy efficiency.

Our at-a-glance icons tell you how our appliances are rated within the EU energy efficiency scheme.

A++ energy rating

Many of our refrigeration models have an A+ rating, meaning that they use over 25% less energy than equivalent A-rated products. In fact, two of our products are so energy efficient that they have been awarded an A++ rating.

10%, 20%, 40% better than A-rated energy efficiency

Many of our laundry products are so energy efficient that as far as the EU energy labelling scheme is concerned, they are simply off the scale. All our washing machines use either 10% or 20% less energy than required for an A energy rating, and our new EcoLogixx 7 tumble dryer uses an incredible 40% less energy than a standard A-rated model.

Look out for this new Bosch energy efficiency symbol as it is there to help you identify our most energy efficient models.

Energy saving recommended

This Energy Saving Trust initiative is backed by the UK government. The logo is only found on products that have been carefully selected for their energy efficiency. Buy where you see the sign and help save energy, money and the environment.

2002

International steering committee

Our steering committee is created to support our environmental policy.

2004

UN's Global Compact

Bosch signs up to the UN's Global Compact initiative to promote sustainable and socially responsible working policies.

2006

Bosch support the pan-European campaign "Sustainable Energy Europe".

2007

Refrigerator exchange initiative in Brazilian shanty towns

Contribution to climate protection through the refrigerator exchange programme for Brazil's poorer citizens.

2008

Carbon footprint

Balance sheet detailing all CO2 emissions from Bosch compiled, and "carbon footprint" calculated

* As of January 2008. Combined water and electricity consumption for a standard programme on a Bosch Logixx dishwasher.

Home laundry.

Logixx

Our premium range, with exceptional cutting-edge features and extras. Like super energy-efficient, large-load washing machines, with unique SoftSurge™ drum system, and the Auto Stain Removal System. Or the new EcoLogixx 7 tumble dryer, with its groundbreaking Automatic Self-Cleaning System.

Exxcel

Mid-range models with a broad range of extra features and benefits. Including large capacity drums and a wide range of programme options designed for today's lifestyle, like the Dark and Sports Wash programmes, and the blisteringly fast Super Quick 15-minute programme for light loads, one of the shortest complete wash programmes of any machine on the market.

Classixx

Simple practical models offering Bosch build quality and value for money, Classixx washing machines feature the Express Wash system, for 40% faster programme times, and tumble dryers with sensor electronics for efficient drying. The range also includes our slimline washing machine for when space is at a premium.

Wash programmes.

Perfectly tailored to suit modern fabrics and lifestyles. Bosch washing machines have a choice of 15 different clothes care programmes for you to choose from.

Dark wash

Designed specifically for dark clothes, and available across a range of temperatures, this programme reduces fading, and ensures no flecks of washing powder remain on your clothes at the end of the wash.

Delicates silk

An especially caring programme with a gentle wash action. Intermediate spinning in the rinse cycle is omitted, and a gentle final spin at 600 rpm completes this delicate programme.

Handwash wool

An exceptionally gentle woollens handwash programme, which runs at only 27 rpm (usual speed 50 rpm) with a soft wash action and special spin phase that ensures that everything stays in good shape.

Mixed load

A fast wash that allows mixed fabrics and colour loads to be safely washed together. Originally designed with school uniforms in mind, it is capable of handling up to 3kg of washing, and is ideal for quick washes that might be required before a full load of laundry has been collected.

Power wash 60

The Power wash 60 programme for medium loads (up to 5kg) gives an A-class performance wash within 60 minutes.

Sensitive

By prolonging the maximum wash temperature, increasing the water level, and adding an extra rinse, this programme reduces exposure to allergens that irritate sensitive skin.

Sports wash

A programme for modern sports clothes with Sportswear microfibre technology like those used for gym, cycling or jogging.

Super quick 15

A short programme of approximately 15 minutes for 2kg of lightly soiled washing – that's roughly equivalent to one outfit or 10 men's shirts. Packing in a wash, two rinse cycles and improved rinse spinning, this is one of the shortest complete washing programmes of any machine on the market.

Pre-wash option

For especially dirty clothes, a pre-wash will loosen dirt and remove it from the clothes prior to the main wash.

Reduced ironing option

The laundry is tumbled gently periodically during the normal programme spin cycle, and then at the end of the spin phase, keeping laundry fluffy and tangle free. The result is reduced creasing, and therefore easier ironing.

Washing machines features and benefits.

Performance

Up to 20% better than A-rated energy efficiency

At Bosch, we take energy efficiency very seriously, and we work hard to make our home laundry products some of the most energy-efficient performers in the industry. In fact as far as the EU Energy Efficiency rating scheme is concerned, our washing machines are so efficient they are off the scale. All our washing machines deliver an A rated wash performance, while using 10% or even 20% less energy than required for an A energy rating.

Look out for this new Bosch energy efficiency symbol as it is there to help you identify our most energy efficient

machines. This has been awarded to all our washing machines that use 20% less energy than equivalent A-rated models.

Aqua plus

A higher water level is used throughout the wash and rinse cycles of the chosen wash programme – for best rinsing results

Wash plus system

Extends a wash programme to give a more intensive wash, delivering the equivalent of an A-class wash performance not only at 60°C, but at 40°C and 90°C as well.

3D AquaSpa wash system

Water enters the drum from three sides for quick and effective distribution.

Sensor electronics

Sensors continually monitor the progress of the wash, making adjustments when necessary to ensure optimum performance. Our top-of-the-range machines can even tell you how much more laundry you can add without overloading, and exactly how much detergent will be required.

Auto stain removal system

Grass, tomato, red wine – all stains are not alike. Hot or cold water, longer or shorter washing cycles, more or less intensive drum rotation – the Auto Stain Removal System on the new Logixx 8 comes with settings to deal with 16 of the most common stain problems.

Unique SoftSurge™ drum system

Gives better cleaning results, as well as providing greater protection for your washing. The asymmetric paddles and 'rain-drop' drum surface design provides power for those heavy-duty jobs, while being gentle on your clothes. The advanced Water Flow System more efficiently distributes the water and detergents through the wash, and reduces soaking time. Add to this the new moulding of the window glass that guides your laundry towards the centre of the drum, and so avoids snagging of small items between the glass and the door seal, and you have the new state-of-the art SoftSurge™ drum system; efficient, gentle and time saving.

Perfect-rinse detergent drawer

Jet-inlet sprays in every corner of the specially shaped detergent drawer thoroughly rinse away detergent – so no more sludgy residue left in the drawer at the end of the wash.

Foam detection

This feature will notify you when excess foam caused by detergent overdosing is detected. Exxcel models only.

Convenience

Time delay

This option allows you to programme your washing machine to start between 1 and 24 hours after you set it. So you can time your washing to be ready for when you get home, or take advantage of cheaper late-night electricity rates.

Reload

We've all done it – left a sock on the stairs, then realised it's too late because the wash cycle's started. Or perhaps you've put a red garment into a white wash by mistake. With our Logixx 8 and our Exxcel 7 machines, the problem's solved. The pause option allows you to open the door early in the cycle to add (or remove) the offending item.

Digital displays and easy programme control

All our Exxcel and Logixx 8 washing machines feature large displays that clearly show the wash progress, time remaining, spin speed and temperature selected. And choosing the right programme for your wash is simplicity itself. The elegant fascia design features a control dial to select the programme by clothes or fabric type, while additional washing options can be selected at the brush of a touch-sensitive button.

Safety

MultiSafe

All Bosch washing machines are designed with safety in mind, from the highly pressure-resistant water supply hose and overflow prevention systems, to the electronic lock that prevents the porthole from being opened unintentionally mid-cycle.

A new dimension in washing – Logixx 10.

With a drum size 70% larger than a standard machine this is our gentle giant. Whether it is a daily wash, a weekly wash or the school team football kit, the Logixx 10 will handle it without fuss.

A new dimension in washing

The Logixx 10 will swallow a staggering 10kg of washing while still delivering a wash quality that is second to none. The drum is almost 70% larger than on a standard machine, and the massive door opening makes loading and unloading a breeze. So now you can wash large items, like bulky double duvets or curtains, without a trip to the launderette.

The unique 3 dimensional wash system

So how have Bosch achieved all this? It's all down to the revolutionary drum and paddle design. Following the principle of the Archimedes screw, the specially designed paddles in the inclined drum act to push the washing forward as well as around, while working to saturate the washing continually during the wash process, thus ensuring that your laundry is perfectly agitated and washed at the same time. So whether you are washing a large load, something bulky, or even a delicate item, your laundry is given the best care throughout the wash cycle.

Packed with programme options

But large loads aren't the Logixx 10's only forte. Bosch's commitment to complete fabricare remains as important as with our other machines.

A gentle wool programme and hand wash silk programme will deliver results that are better than hand washing – so this really is a gentle giant.

The additional space in the drum in combination with the Reduced Ironing option leaves your laundry less creased and therefore easier and quicker to iron.

Mixed loads of up to 4kg can be washed in just 35 minutes making this a faster machine than its looks might suggest.

There is even the reload function just in case you need to add something to the wash once the machine has started.

Logixx 10 1200 washing machine

WBB2476GB white

Capacity **10kg / 22lbs**

Spin speed **1200-600**

Consumption rates

60°C Cotton stains with intensive wash

Time **160 mins**

Energy **1.70 kWh**

Water **74 litres**

- Extra large smooth drum (88 litres) with huge 10kg capacity and 13° tilt
- Clear text LCD panel displaying up-to-the-minute information
- 15 'Clothes Care' programmes
- Maximum spin speed 1200
- Express Wash system with up to 40% faster programme times
- Time delay 1 – 24 hours and time remaining
- Set programme end time
- End of programme indication in “real” time
- Mixed Load programme for all types of fabrics and colours (4kg)
- Handwash programme for wool
- Reduced Ironing option
- Wash Plus system for A-class wash performance
- Three levels of wash intensity: Light/Normal/Intensive
- Delicates Silk programme
- Spin speed selector through LC display with rinse hold option
- Reload function
- Safeguard monitoring system adjusts load distribution and programme settings to protect clothes
- The extra large porthole (41cm) with 180° opening door makes loading and unloading exceptionally easy
- Cold fill with performance enhancer to assist with stain removal
- Rinse Plus for best rinsing results
- Safety lock
- Keylock programme
- Audible alarm
- Very quiet noise level

Optional accessories:

Pedestal: WMZ 20400. Raises the height of the machine and also acts as a drawer.

**Matching 10kg
vented dryer available –
see page 30**

With memory programmes you can design your own...

The two memory programmes on this washing machine allow you to conveniently store two specialised wash cycles, each individually tailored to your specific needs. Just choose a temperature and spin-speed, select any other washing options required, and use a memory programme to store the details for next time.

Logixx 8 1400 washing machine

- Floor securing bracket: WMZ2200
- Hose extension: WMZ2380

Tumble dryers.

Tumble dryers features and benefits.

Performance

Sensor drying

Throughout the drying cycle advanced sensor electronics monitor your laundry, preventing overheating, and automatically stopping once your garments reach the desired level of dryness. Fibre damage caused by over drying becomes a thing of the past, and there is no excess energy consumption.

Low heat

Bosch condenser dryers have an innovative low heat feature that protects temperature-sensitive textiles by automatically reducing the heat in the final stage of drying, and extending the drying time. The Logixx condenser dryer goes a step further with its super-delicate drying feature which reduces the temperature of any programme by 10°C throughout the drying cycle, while also allowing for additional fine adjustment of temperature.

Up to 40% better than A-rated energy efficiency

At Bosch, we take energy efficiency very seriously, and we are continually striving to improve the efficiency of our tumble dryers, making them more economical to run, as well as friendlier to the environment. So our new EcoLogixx7 tumble dryer incorporates ground-breaking heat pump technology that cuts energy consumption dramatically. In fact, as the first tumble dryer in the world to consume less than 2kWh for a standard programme, it uses a whole 40% less energy than an equivalent A-rated model.

Look out for this new Bosch energy efficiency symbol as it is there to help you identify our most energy efficient machines. This has been awarded to our EcoLogixx 7 tumble dryer that uses 40% less energy than equivalent A-rated models.

Super quick 40 minute programme

A shorter programme of approximately 40 minutes for lighter loads of up to 2kg – roughly equivalent to ten business shirts – with sensor control to ensure great drying results.

The 'Revolution' drying system

The new Bosch condenser dryers have an airflow system that combined with the unique drum and paddle action, creates an incredibly efficient and caring drying solution.

The large drums (up to a massive 10kg capacity) allow larger pieces of laundry to be dried quickly and evenly, and the unique textured drum surface ensures greater care of the most delicate fabrics by improving the airflow and keeping the laundry raised from the surface of the drum.

Finally, the soft structure of the archimedic style paddles ensures a gentle three dimensional distribution of the laundry, bringing the laundry forward as well as around the drum. The result is more even drying results, greater care of garments, and less creasing.

We offer both condenser and vented dryers – what's the difference?

Condenser dryers collect the condensed water vapour that occurs during the drying process in an easy-to-access container. As a result they do not require an external wall vent. Vented dryers exhaust the water vapour through a pipe at the back of the dryer, which must ventilate directly into the open air through an outside wall vent.

Convenience

Anti-crease cycle

Bosch dryers feature an anti-crease programme to reduce the burden of ironing. A gentle drum action automatically separates and smoothes your garments for up to 60 minutes on standard dryers, or 120 minutes for models with the reduced ironing option, to keep them wrinkle-free and ready-to-go.

Automatic self cleaning system

Water extracted during the drying cycle is used to flush the condenser, removing the lint that would otherwise reduce its efficiency. So the EcoLogixx 7 will deliver a better than A-rated performance, every time.

LC display

The liquid crystal display on the Logixx models, keeps you in touch with the progress of your laundry. Select the start time and you will know precisely when your clothes will be ready. It also gives you the freedom to select additional options to enhance the drying process.

Time delay

This option allows you to programme your tumble dryer to start between 0.5 and 24 hours after you set it. So you can time your laundry to be dry for when you get home, or take advantage of cheaper late-night electricity rates.

Safety

Warning indicators

No need to check the fluff filter or condenser water container. Indicators on the fascia panel will remind you when it's time to empty them.

Safety lock

The safety lock feature will prevent little fingers from interfering with the machine when it is functioning.

EcoLogixx 7.

Thanks to innovative heat pump technology, the Bosch EcoLogixx 7 tumble dryer uses over **40% less energy than a standard A-rated dryer**, and is the first tumble dryer in the world to consume less than 2kWh for a standard programme.*

* As of September 2008.

EcoLogixx 7 condenser dryer**WTW84560GB white**

Capacity 7kg / 15.4lbs

Consumption rates 1000 rpm

Time 124 mins

Energy 1.9 kWh

- 15 'Clothes Care' programmes
- Uses 40% less energy than a standard A-rated tumble dryer
- The innovative Automatic Self Cleaning System keeps the condenser lint-free, ensuring an A-rated energy performance every time
- Super Quick 40 minute programme
- 3 drying levels for Cottons, Easy-care and Timed Programmes
- Large drum up to 7kg load
- Drum with soft paddles for less creasing
- Sensor drying
- Anti-crease cycle
- Fine adjustment of the drying level
- Two level low heat option for delicate fabrics and synthetics
- Wool finish programme
- Timed programmes
- Time delay 1 – 24hrs
- Mixed Load programme
- Freshen Up programme
- Sportswear programme
- Reduced ironing option
- Easy-to-use programme selector and touch controls
- LC display with programme status by icon, remaining time and spin speed input
- Input of spin speed during cycle
- Warning indicators for fluff filter and condensed water container
- The large porthole makes loading and unloading exceptionally easy and reduces creasing
- Large and easily accessible fluff filter
- Drum interior light
- 3-level acoustic signal
- Programme safety lock and child lock
- Very quiet noise level

**Automatic Self Cleaning System**

For a tumble dryer to run at peak efficiency, the condenser has to be kept clean of the lint that inevitably gathers there over time. So avoiding a gradual decrease of efficiency over the lifetime of the appliance has traditionally meant periodically removing and washing the condenser by hand. The EcoLogixx 7 has the solution – the groundbreaking Automatic Self-Cleaning System. Water extracted during the drying cycle is used to flush the condenser, removing the lint that would otherwise reduce its efficiency. So the EcoLogixx 7 will deliver a better than A-rated performance, every time.

Optional accessories:

Stacking kit: WTZ11310

Stacking kit with pull-out shelf: WTZ11300

Build under cover plate WTZ10290

Logixx 8 condenser dryer

The Bosch washer dryer. Space saving and convenient.

If you want a washer and dryer but you're short of space, this is the **perfect solution**. With the non-stop programme, our washer dryer can launder a half load of easy-care fabrics in one hour.

Exxcel 8 1200 Washer dryer**WVD24520GB white****WVD2452BGB black****WVD2452SGB silver (not pictured)**Capacity washing **5kg / 11lbs**Capacity drying **2.5kg / 5.5lbs**Spin speed **1200-400**Consumption rates (washing) **60°C cottons**Time **130 mins**Energy **0.90 kWh**Water **45 litres**

- LC display with programme status via symbols, remaining time, spin speed and detergent over-dosage indicator
- 15 'Clothes Care' programmes
- Sensor or timed drying
- Variable temperature
- Maximum spin speed 1200
- Express Wash system with up to 40% faster programme times
- Time delay 1 – 24 hours
- Super Quick 15
- Mixed Load programme for all types of fabrics and colours
- Handwash programme for wool
- Reduced Ironing option
- Wash Plus system for A-class wash performance
- Rinse Plus option for best rinsing results
- Delicates Silk programme
- Dark Wash programme
- Sensitive programme
- Sports Wash programme
- 3D AquaSpa wash system
- Variable spin speed selector (100 rpm increments) through LC display with rinse hold option
- Safeguard monitoring system adjusts load distribution and programme settings to protect clothes
- The large porthole (30 cm) with 180° opening door makes loading and unloading exceptionally easy
- Cold fill with performance enhancer to assist with stain removal
- Two drying levels
- Quiet noise level
- Multisafe for complete peace of mind

Optional accessories:

- Cover plate: WMZ2420

Complete ironing solutions

Whether you need to handle a couple of shirts or a week's worth of family washing, **Bosch has the perfect iron for you:** from super-fast steam stations, to traditional feature-rich steam irons. For a brochure of our complete range of irons and small appliances please call 0844 892 9023.

Steam output

Features range from water spray and vertical shot of steam, to continuous steam output of up to 100 g/min so you can cope with anything from crease removal to freshening hanging items such as curtains and jackets. All irons have variable steam, giving you complete control.

Soleplates

Bosch irons have superb glide and scratch resistance for ease of use, whichever model you buy. The Inox Glissée soleplate is a specially coated stainless steel. The Palladium Glissée is an easy glide ceramic soleplate

Anti-calc system

The built-in resin filter in the water tank automatically reduces water hardness and prevents the build up of limescale, increasing your iron's life. Even in a relatively hard water area you can use it straight from the tap.

Drip-stop system

Automatically shuts off the water supply to the soleplate until the iron is hot enough to produce steam, avoiding accidental drips onto your clothes whilst ironing.

AIR-System

Banishes soleplate hot-spots that can ruin delicate materials. An air chamber between the heating element and soleplate ensures even heat distribution, caring for all your clothes.

Auto shut off

A built in safety system for complete peace of mind. Auto shut-off switches the iron off after 30 seconds if it is left face down, or after 8 minutes if left standing – so it doesn't matter if you get called away or forget to switch it off.

The Bosch SensiXX Solutions range

Every model in the SensiXX range has all the features you would expect in a top-of-the-range iron, so you can cope with anything from crease removal to freshening hanging items such as curtains or jackets, or even setting pleats. All irons have variable steam too – giving you complete control of steam output for the task in hand.

SensiXX Comfort ALL STAR TDA8319GB

Features all the essential qualities you would expect from a Bosch iron, including the Anti-calc and Drip-stop protection systems, and the fabric protection AIR-System.

SensiXX Comfort POWER TDA8337GB

The most powerful iron on the market, offering a massive 2700W for ultimate ironing performance.

SensiXX Comfort PROTECT TDA8339GB

The first iron with an anti-shine soleplate cover to protect dark and delicate clothes from that all too familiar shine effect.

SensiXX TDA4622GB

Uniquely modern in design, and especially shaped for stable positioning and easy cord-tying, both models have the Palladium Glissée ceramic soleplate, and so will easily glide in any direction without causing creasing. The soleplate's steam channel ensures perfect steam distribution, and its 3-zone layout gives perfect ironing results.

SensiXX TDA4632B

SensiXX PREMIER TDA7630GB

With the Premium Secure auto shut-off function, and an extra large 400ml water tank for safe and more efficient use. Uniquely designed with a backfilling feature, which allows the tank to be refilled via a large rear water inlet. Also features the dynamic Palladium Glissée ceramic soleplate, with a specially designed tip for ironing around buttons and other hard-to-reach areas.

SensiXX PREMIER Plus TDA7635GB

Professional Steam Stations TDS25 range

The choice of professionals, the TDS25 steam generator irons represent the ultimate ironing tool, with an ultra-fast start-up time, large removable water tank, and the power to flatten creases for an unlimited time thanks to the permanent refilling technology.

Dishwashers.

Logixx ActiveWater

Our premium range, with exceptional cutting-edge features and extras. Featuring ActiveWater technology, heat exchanger drying, automatic wash programmes, and a wealth of other cutting edge features, the Bosch Logixx models are not only the world's most powerful dishwashers, but also the world's most economical*.

Exxcel ActiveWater

Mid-range models with a broad range of extra features and benefits. They offer greater capacity, use less water, are quieter, and boast more features than the basic models. Like the automatic daily programme, the powerful IntensiveZone function, and the amazingly flexible Vario and VarioFlex basket systems with Rackmatic™.

Classixx

Simple, practical models offering Bosch build quality and value for money. But they still feature the triple-A rated performance that comes with all our dishwashers, and a host of useful features, including the large item spray head, the convenient half load option, and a 29-minute quick-wash programme.

* As of January 2008. Combined water and electricity consumption for a standard programme on a Bosch Logixx dishwasher.

Bosch dishwasher programmes.

Designed to make your life easier – Bosch dishwashers offer the ultimate in wash performance. A range of different programme options ensure that the wash and rinse cycles are tailored to the load.

Pre-rinse

For rinsing dishes prior to the main wash, and can be used to prevent odours when storing dirty dishes over night.

Normal 65°C

A daily wash programme for a normally soiled mixed load.

Delicate 40°C

A gentle wash, perfect for delicate crockery and glassware.

Economy 50°C

The most efficient and eco-friendly programme, it uses less energy and water but gives the same A-rated cleaning results.

Intensive 70°C

Perfect for heavily soiled, burnt-on pots and pans.

Quick wash 45°C

A-rated cleaning performance in only 29 minutes – perfect for entertaining, or when the tableware is only lightly soiled.

Auto delicate 35-45°C

A gentle sensor-controlled wash programme for delicate tableware. The sensors adjust the programme according to the amount of soiling.

Auto daily 45-65°C

A daily sensor-controlled wash programme for a normally soiled mixed load. The sensors adjust the programme according to the amount of soiling.

Auto intensive 65-75°C

A sensor-controlled wash programme designed for heavily soiled, burnt-on pots and pans. The sensors adjust the programme according to the amount of soiling.

The world's most economical dishwasher is also the world's most powerful dishwasher*

Maximum performance meets minimum consumption.

ActiveWater from Bosch - Nothing less than the invention of a revolutionary new dishwashing system that uses every single drop of water to the maximum, and makes these dishwashers the most efficient ever to leave the production line.

ActiveWater

Technology serves economy

The incredible increase in efficiency of the ActiveWater dishwasher models has been achieved through the development of a new dishwasher system that maximises water efficiency during rinse cycles: faster heating, optimised filter system, targeted water distribution and improved pump performance. For the new ActiveWater dishwasher this spells: less water, less energy, more performance.

* As of January 2008. Combined water and electricity consumption for a standard programme on a Bosch Logixx dishwasher.

Dishwasher features and benefits.

Performance

AAA performance

At Bosch we are aware of the importance of energy efficient and environmentally friendly appliances. We are so confident of the quality and efficiency of our dishwashers that we offer AAA rated appliances in all our full size models, plus Exxcel and Logixx models in the slimline range – making our models the most efficient in the world.

5 spray levels

The uniquely designed curved spray arms distribute water precisely and effectively, ensuring perfect results every time. The water is sprayed on five different levels for maximum performance, including a downward spray to ensure that the filter area is kept permanently flushed clean.

HydroSensor III

Checks the degree of soiling in the prerinse water and decides whether it is clean enough to be used for the main wash cycle. If the water contains only a small amount of soiling, the water is reused. Around 20%, or 4 litres, of water can be saved using the HydroSensor.

Heat exchanger

The unique heat recycling reservoir maximises performance by using heat that is generated in the main wash to pre-heat cold water used for the rinse cycles before it enters the dishwasher. Preheating the water minimises the risk of thermal shock which can occur when cold water strikes warm delicate items which can cause cracking or breakages. As an additional benefit this system is also an extremely energy efficient method of heating the water.

Detergent aware

No matter which detergent you use – 5in1, 4in1, 3in1, 2in1 tablets or separate components – all our dishwashers will adjust the cycle to ensure that you always get the best possible results – every time. (Note that to ensure these results dishwasher salt should always be used).

DosageAssist

The DosageAssist feature maximises the effectiveness of detergent tablets. The detergent dispenser is conveniently located in the centre of the top of the door, where it is protected from food remnants that drip whilst loading the dirty dishes. At the beginning of the wash cycle, the tab drops into a special tray in the top basket where its dissolving is controlled to assure outstanding results. This prevents tabs dropping down between plates or cutlery, or not dissolving completely, resulting in a less-than-perfect cleaning performance.

IntensiveZone

To save you the chore of scrubbing heavily soiled pots and pans, the entire bottom basket can be transformed into a power cleaning zone with increased spray pressure and a higher cleaning temperature, while in the top basket delicate glasses and dishes are rinsed gently and protectively.

Hygiene Extra

Select the new Hygiene Extra option for a hotter final rinse – perfect for cooking utensils, glass jars, chopping boards and baby bottles.

AquaMix

Bosch AquaMix allows you to wash your delicate glasses with complete confidence. By regulating the level of water hardness in the machine and topping up with water directly from the mains it produces the best water hardness level for glass, ensuring a sparkling finish every time.

Advanced filter system

Our easy to remove and clean filter system now has 50% more surface area. This allows for up to 15% more water to be circulated through the system, so that even more cleaning power can be squeezed from every drop of water.

Safety

Aquastop 24-hr flood protection

All Bosch dishwashers have flood protection systems, but for added peace of mind, most Exxcel and all Logixx models feature 'AquaStop', a device that cuts off the water supply in the case of leaks, and a safety water valve to guard against siphoning, even when the machine is switched off.

Safety lock

All our dishwashers feature a lock which prevents the door from being opened during operation, while selected models also feature tamperproof controls, to stop little fingers interfering while the machine is running.

Dishwasher features and benefits.

Convenience

Express wash

The Express Wash system optionally reduces programme times by up to 50%, but without compromising on quality. So you still get hygienically clean and dry dishes, but in as little as half the time – ideal for busy households and when entertaining.

Large item spray head

The large item spray head makes light work of baking trays or oven shelves, without the need for pre-soaking. Simply remove the upper basket, attach the large item spray head, and get powerful cleaning where you need it. The large item spray head comes as standard with all Bosch dishwashers – and on Exxcel and Logixx models, it's now even larger.

Half load

If you don't have enough for a full load and can't wait, simply load the crockery, plates, pots and pans anywhere in your dishwasher, select the programme temperature and press the half load button. The programme time is reduced and up to 30% less water is used.

14 place settings

There is enough space for 14 full place settings in the Logixx ActiveWater dishwashers with VarioDrawer. Or, put into figures: 14 dinner, soup and dessert plates, 14 cups and saucers, 14 glasses and 14 cutlery settings – knife, fork, soup, tea and dessert spoons, plus 1 oval serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.

Vario, Varioflex or VarioFlexPlus baskets with Rackmatic™

With the enlarged loading area, the Bosch basket systems featured in the Exxcel and Logixx models offer more capacity, up to 14 place settings, and greater flexibility. With up to six foldable racks the system can be adapted to any load, and all items are assured a firm, secure place in the protective racks. The new 3-stage Rackmatic™ system makes it a simple matter to adjust the height of the upper basket, even when it is fully loaded – normally a cumbersome task. With three different loading heights a large variety of plates, glasses and other dishes can easily be accommodated.

The VarioDrawer

A unique feature of our new top-of-the-range Logixx dishwasher interior is a third loading level – the VarioDrawer. It replaces the cutlery basket, freeing even more space in the bottom basket. The VarioDrawer is easily removable to allow loading and unloading of cutlery, and there is even room for espresso cups and kitchen utensils. And what's more, even with the drawer in place you can still load long-stem wine glasses in the upper basket.

Logical control

All our machines feature water supply, salt and rinse-aid indicators, as well displaying remaining programme time and start time delay.

Bosch recommends Finish

Use Finish to get amazing results every time you open your Bosch dishwasher. Finish have a complete range of products to suit your dishwashing needs, including new Finish Quantum which combines the power of three separate ingredients in one single product to give you amazing shine and clean. A range of enhancers are also available such as Finish Intensive Clean & Care Dishwasher Cleaner which removes grease and limescale to maintain your machine's performance and give you perfect results in every cycle.

Available until July 2009

The dishwasher that fits into every kitchen

Our compact dishwashers are designed especially for small kitchens or for small households in which a large dishwasher may be uneconomical. They are also ideal for use in offices and holiday homes. Though not much larger than a microwave oven, they offer the technical refinements found on larger models. They can be built in for a more streamlined look or just stand on a worktop.

Compact yet spacious

The baby of the Bosch dishwasher family still has room for 4 full international place settings – that's 51 items in all. Larger articles such as pots and pans can of course also be accommodated.

Water pressure required: 0.5-10 bars, flow rate 10 litres per minute.

Bosch does not recommend connecting dishwashers to an artificial water softening unit since this could adversely affect the performance of the dishwasher.

Data in this table valid as of April 2009. Subject to modification without prior notice.

 **BOSCH**

Refrigeration.

Logixx

Our premium range, with exceptional cutting-edge features and extras. A beautiful combination of high convenience technology and intelligent design, from the revolutionary storage solutions of the Easy Access under counter models, to the amazingly energy efficient Logixx fridge-freezers, featuring Frost-free system, Multi-airflow cooling and precise electronic temperature control.

Exxcel

Mid-range models with a broad range of extra features and benefits. With Auto defrost and Frost-free systems that mean you never have to worry about defrosting the fridge or freezer again, state-of-the-art features including the Superfreeze function, and clever food storage ideas like the Big Box and can dispenser.

Classixx

Simple, practical models offering Bosch build quality and value for money. All Classixx fridges and fridge-freezers feature Auto defrost systems, and the range includes a fridge-freezer so efficient that it has been awarded A++ by the EC Energy Efficiency rating scheme. It uses up to 45% less energy than an equivalent A-rated model.

Refrigeration features and benefits.

Performance

Up to 50% better than A-rated energy efficiency

Unlike your washing machine or dishwasher, your fridge or freezer is on 24 hours a day, so it is especially important that the appliance does not waste energy. At Bosch, we take energy efficiency very seriously, and we work hard to make our cooling products some of the most energy-efficient performers in the industry. With the exception of the wine coolers, every model in the range has been awarded at least an A in the EC Energy Efficiency rating scheme. But we go further. Many models have an A+ rating, using as much as 25% less energy than equivalent A-rated models, and we even offer a super-efficient fridge-freezer and upright freezer with an A++ rating that uses up to 45% less energy than an equivalent A-rated model.

Look out for this new Bosch energy efficiency symbol as it is there to help you identify our most energy efficient models. This has been awarded to all our cooling products that are either A+ or A++.

Active cooling

The temperature within a conventional fridge can be uneven, since warmer air rises. Bosch ActiveCooling solves this problem by blowing cold air into all areas of the fridge by fan or rear wall venting. Sensor electronics maintain a constant temperature throughout the compartment to $\pm 1^\circ\text{C}$. Your food is protected against bacterial growth, and is kept fresher for longer.

Multi airflow cooling

Greatly improves circulation of air around the fridge, regulating temperature and humidity levels, and eradicating condensation build-up, so that your food stays fresher for longer.

Supercool

Putting new food into your fridge causes the internal temperature to increase, so your fridge has to work harder to cool down, and the food already stored in there can get warmer. Supercool will prepare your fridge by rapidly reducing the temperature, keeping the contents cool, and quickly cooling the new groceries down to 2°C .

Superfreeze

Adding new food to the freezer raises the internal temperature, and the freezer has to work harder to avoid food already in there warming up, and possibly even part defrosting. The Superfreeze function rapidly lowers the temperature in the freezer, ensuring that the fresh food is frozen quickly, while surrounding frozen food stays frozen. So even when the door is open for longer periods, the contents are protected.

Design

Individual freezing elements

All standard (non Frost-free) Bosch freezer drawers feature individual freezing elements which ensure an even temperature throughout the freezer as well as efficient freezing down in every drawer.

Chiller safe

The recommended storage area for meat, fish and ready-meals, this high-performance chiller compartment provides a lower temperature and reduced humidity environment that helps to keep your food fresh, flavoursome and nutritious for longer.

Vegetable/salad drawer with rippled base

Food will stay fresher for longer, as the ripple base technology leads to a reduction in humidity levels and improved air circulation.

High-door design

Our range of Logixx fridge-freezers all feature the stylish high door design, with elegant in-door electronic controls that give an at-a-glance view of the temperatures of both the fridge and the freezer.

Neat designs for easier living

Across our refrigeration range you will see a whole host of smart food storage ideas, like the neat in-door aluminium bottle clip for cans or a bottle in Logixx fridge freezers, or the Pizza box – a small compartment in the freezer compartment of selected models that is ideally suited to storing pizzas – and the Berry tray, designed for freezing soft fruit individually so that they don't stick together.

Air-fresh filter

All our Logixx fridge-freezers feature an air-fresh filter. Lasting the lifetime of the appliance, the air-fresh filter ensures that odours in the fridge are reduced, and the transfer of food smells is minimized.

Can dispenser

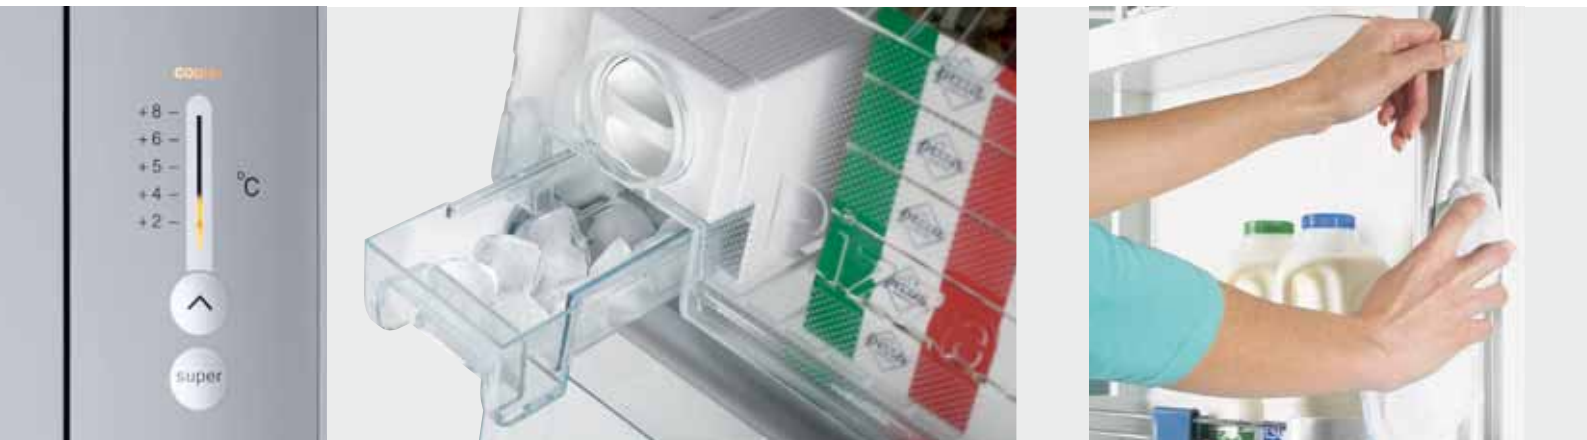

Available on selected fridge-freezers, the can dispenser holds up to five standard cans and can be hung beneath any shelf you choose by simply sliding on or off.

Bottle rack

The basic shelf-top bottle rack is featured on selected models throughout the range, and allows you to stack up to six wine bottles in a pyramid configuration. Selected models feature the space-saving clip-on chrome bottle rack, which hangs underneath a shelf, or the premium full-width chrome bottle rack.

Refrigeration features and benefits.

Convenience

Frost-free

Available on selected fridge-freezers, this innovative system eliminates the formation of ice on food and the freezer interior, meaning you never have to worry about defrosting again. Intelligent electronics ensure that the defrost operation is only initiated when the appliance actually needs it.

Auto defrost

Automatically defrosts the fridge at regular intervals without the need to switch off the appliance or remove the food stored.

Electronic temperature control

Accurate temperature control is essential to maximise the freshness of your food. Our premium fridge-freezers feature accurate electronic control and temperature display for both fridge and freezer sections.

Big Box

This extra large freezer drawer (26cm instead of 18cm high) means you can store bulky frozen goods or stack freezer containers.

Twist ice dispenser

Simply twist, and the ice cubes drop conveniently into the pullout tray below – an elegantly simple idea to make your life just that little bit easier.

Easy to clean

All our fridges have smooth, easy-to-clean interior walls, and most of the interior fittings can be washed occasionally in a dishwasher for an extra thorough clean. The magnetic door seals on all of our refrigeration range are removable, making them easy to clean and/or replace if necessary.

Safety

**** freezer compartment

Bosch freezer compartments allow food to be stored below -18°C so that it can be stored for longer.

Anti-bacterial protection

Most of our fridge and fridge-freezer models have natural silver elements within the lining of the fridge section which gives lifetime protection against bacteria, micro organism and algae growth, providing the safest possible storage environment for your food.

Safety glass shelves

Our safety glass shelves have an anti-spill trim, and can hold up to a pint of liquid in case of accidents. They also have a scratch-resistant, non-slip surface, and are very easy to clean. All shelves are height adjustable allowing you to maximise the interior storage space.

Door open and optical alarm

With this feature, if you inadvertently leave your freezer door ajar an alarm will sound so that you can prevent food spoilage. Then for extra peace of mind, there is a warning light that will illuminate to let you know immediately if the freezer reaches a dangerously high temperature.

The Easy Access range.

A revolutionary storage concept. What makes Easy Access different from any other fridge is that it employs a system of pull-out drawers instead of traditional shelving. Being able to access all items without moving other items or excessive bending down makes this a truly innovative product.

Larger capacity

The new design utilises the interior space more efficiently than in a conventional fridge resulting in 28% bigger drawers and a 30% bigger salad compartment and allows storage of up to eight 1.5 litre upright bottles and six horizontal bottles.

Easier to clean

If anything does spill, the drawers contain liquids so they can't leak to other levels of the appliance. The smooth surface of the drawers is very easy to wipe clean, though the drawers can be removed easily if more thorough cleaning is required.

Excellent visibility

With the pull-out drawer system you can see exactly what you've got in your fridge without having to take everything out first.

Everything has its place

Everything – from bottles, to eggs and butter – is kept safe and securely in place thanks to space dividers and bottle grips.

The big fresh one

This dual-purpose drawer succeeds where traditional fridges fail. Not only does it provide more space for storing fruit and vegetables comfortably, it provides a home for bottles and tall items that need to be stored upright.

Two drawers in one

The ingeniously designed drawer ensures the best use of space within the appliance. The extra-deep section is ideally suited for storing taller items such as tins, bottles or jars while the shallow section creates space for bottle storage in the drawer below.

Ultra energy efficient

Our GSN40A31 upright freezer is so energy efficient that it has been awarded an A++ rating in the EC Energy Efficiency rating scheme. In real terms this means that it uses 30% less energy than an A+ rated product and approximately up to 45% less energy than an A rated product.

American-style fridge-freezers.

Brilliant masterpieces in XXL format, the new Bosch CoolSpace fridge-freezers will easily cope with the demands of a large family, and make a bold design statement too.

High capacity with stylish design

Choose either the classic steel look, with fingerprint resistant finish; sleek, chic gloss black, or the stunning high-gloss glass front white model.

Better than A-rated energy efficiency

The new Bosch CoolSpace models set the standard in high-performance refrigeration technology combined with outstanding environmental-friendliness. All models have at least an A energy efficiency rating, while the top-of-the-range model, with an A+ energy efficiency rating, is up to 25% more economical than energy efficiency class A.

In-door electronic controls

All CoolSpace models feature fully electronic controls set conveniently into the door exterior, giving you precise fingertip control of the temperature of both the fridge and freezer compartments.

In-door ice and chilled water dispenser

The in-door ice and chilled water dispenser gives you the choice of chilled, filtered water, crushed ice and ice cubes – up to 140 every 24 hours.

Fresh protect box

Our top-of-the-range model features a separate compartment with independent temperature control. Conveniently accessible on smooth-running telescopic rails, the multi-purpose Fresh protect box keeps food items fresher for longer. With 3 temperature settings: 4°C, 2°C and 0°C, it can be used to store different foods like fish, meat, vegetables, fruit or dairy products, at the most appropriate temperature for the food type.

EasyLift safety glass shelf

The EasyLift safety glass shelf on our top-of-the-range can be raised or lowered without emptying it first – convenient, flexible, easy.

Dazzling design

The interiors of our CoolSpace fridge-freezers shine with exceptionally bright lighting for optimum viewing.

Separate cooling systems

Coolspace fridge-freezers feature a separate evaporator for the fridge and freezer sections, which not only prevents the transfer of flavours, but also allows the fridge and freezer temperatures to be controlled separately.

Coolspace American-style fridge-freezer

KAD62S20 high-gloss white

Gross capacity **570 litres / 20.1 cu.ft.**

Celebrating over 75 years of Bosch innovation – the Jubilee Special Edition.

Seventy-five years after the debut of the first electric fridge for domestic use manufactured by Bosch, we introduced the Jubilee Special Edition fridge-freezers.

Featuring sleek glass doors in white, red, black and now cappuccino, with sides lacquered in silver, integrated aluminium door handles and touch control LCD electronics, the Jubilee Edition models look simply fabulous. And behind the beautifully stylish exterior lies a whole host of top-of-the-range technologies and features, including Frost Free auto-defrost in both the fridge and freezer sections, the Multi Airflow system for uniform cold air circulation, Anti-bacterial coating and Air-fresh filter for improved hygiene. With a whole 287 litres of storage capacity, top-class energy efficiency ratings, and of course the uncompromising Bosch build quality that you'd expect, you'll see why we think the Jubilee Special Edition range is worthy of its illustrious heritage.

The Jubilee Special Edition range reflects our experience in refrigeration technology, spanning more than 75 years, and our high standards in outstanding workmanship and timeless fine design.

1 Door mounting l (left), r (right), w (reversible).

2 ★★★★★ Freezer -18°C or less, fresh & frozen food.

3 Includes flip down compartment on some units.

4 Temperature increases from -18°C to -9°C, time taken is when appliance is full. When only partially stocked, less time is involved.

5 Freezer capacity quoted may only be attained by switching to constant operation and not on a 24 hour basis.

6 Energy consumption in 24 hours is calculated according to DIN EN 153, 1990 edition.

7 EC rating scheme designed to compare energy efficiency of comparable appliances.

8 Climate Class N : Room temperatures +16°C to +32°C
Climate Class SN : Room temperatures +10°C to +32°C
Climate Class ST : Room temperatures +18°C to +38°C

As a guideline A-C means very economical to economical, D is average, and E-G represents high to higher consumption.

Consumption rates are quoted to assist comparisons for different appliances. During actual operation, consumption may vary slightly.

All cooling appliances require adequate ventilation (min. 200cm³) Please refer to user / installation instructions.

Data in this table valid as April 2009. Subject to modification without prior notice.

Cookers.

Logixx

Our premium range, with exceptional cutting-edge features and extras. Choose a state-of-the-art induction hob, for super-quick, safe and efficient cooking, or a ceramic hob with a dual ring cook zone. All models boast 8 cooking functions, including 3D hot air cooking, and some feature pyrolytic self-cleaning, and automatic pot roasting.

Exxcel

Mid-range models with a broad range of extra features and benefits. Available in two finishes, contemporary black and classic brushed steel, our mid-range model features 7 cooking functions, including 2D hot-air cooking, a self-cleaning programme, and a ceramic hob with a dual ring cook zone.

Classixx

Simple, practical models offering Bosch build quality and value for money. Available in two finishes, classic brushed steel or traditional white, and featuring 7 cooking functions, including 2D hot-air cooking technology, for same temperature cooking on two levels at the same time.

Cooking functions.

Multi-function cooking provides a solution for all your cooking requirements. With a choice of up to 8 different cooking functions, from traditional heating systems to more specialised functions such as Automatic pot roasting and Pizza setting, a Bosch cooker will provide you with the flexibility to prepare a variety of meals for you and your family.

2D hot air cooking

The top and bottom heating elements and the fan work together to distribute the heat throughout the oven, allowing same temperature cooking on two levels at the same time. At higher temperatures (200-220°C), the effect is to evenly grill on two levels – with no turning of the food required.

3D hot air cooking

The upper and lower elements plus an additional element around the fan work together to distribute the heat evenly throughout the oven for same-temperature cooking on three levels. Sweet and savoury items can be cooked at the same time. At higher temperatures (200-220°C) the effect is to evenly grill on three levels – with no turning of the food required. Use high-temperature 3D hot air cooking, for example, to cook an entire full English breakfast.

Conventional top and bottom heat

Employs both the upper and lower heating elements. The heat travels to the centre of the oven by natural convection, which is the best position to obtain the selected temperature. Most foods can be cooked using this system, but it is best suited to foods, which require a dark crisp finish or long slow cooking.

Bottom heat only

Only the bottom element is used to generate heat. This method is ideal for reheating or for when a crisp underside is required such as pizza bases and pastry cases. It can also be used for drying herbs and bain-marie cooking.

Automatic pot roasting

Pot roasting made simple: just select the programme required, input the weight of the item and the oven works out the correct temperature and time. The function also copes with frozen items and the oven can be set to turn on later. The oven will switch off automatically and use residual heat to finish the dish.

Fast heat

This time-saver preheats the oven 35-50% faster by using all the heating elements at once.

Pizza function

Designed with the pizza-lover in mind, but equally useful for quiches and tarts, this innovative function delivers cooking power for a perfectly crisp, browned base while keeping the topping moist. Suitable also for frozen food, and in many cases no preheating is required.

Defrost setting

The defrost setting, perfect for gently defrosting meat, poultry, bread, cream cakes and much more, is available on all our freestanding cookers. It's also ideal for defrosting non-sensitive foods.

Full width variable grill

Enables you to grill large quantities with precise temperature control. For added efficiency grilling is performed with the oven door closed.

Half width variable grill

On selected ovens you have the option to select just the centre section of the grill element as an economical way to grill smaller quantities of food.

Hot air grilling

An ideal cooking method for meat and poultry where a rotisserie effect is desired. The grill and fan operate alternately, which results in even crisp food and can use up to 50% less energy than traditional roasting.

Cookers – oven features and benefits.

Performance

EU Energy Label

To help you choose the most energy efficient appliances, the EU has introduced an energy-rating scheme, all ovens are required to display an EU Energy Label. The most efficient rating is 'A' and the least efficient is 'G', all Bosch freestanding cookers have an A or B rating.

58L or 60L capacities

All our freestanding cookers boast a generously spacious interior oven cavity – 58 litres on all standard models and a full 60 litres on electronic, pyrolytic models. That's easily enough room for a large 32lb Christmas turkey. And the 5 shelf levels give you the flexibility to meet all your cooking needs.

Design

Pop-out controls

Most models feature easy-to-use ergonomic pop-out rotary controls, together with flush-fitting clock control buttons, which not only make operating the cooker easy, but also maintain a clean line when the cooker is not in use, so that cleaning the control panel is extremely easy.

Storage drawer

The below-oven storage drawer offers approximately 32 litres of storage space – great for storing pans and utensils, and conveniently accessible when cooking.

Height adjustable feet

Every freestanding cooker is set to 90cm high, but the feet are easily height-adjustable, if required, to match the surrounding kitchen furniture.

Convenience

Pyrolytic self-cleaning system

Our top-of-the-range models feature the ultimate in self-cleaning power and convenience. In a Pyrolytic self-cleaning cycle, the oven is heated to around 480°C. At that temperature any deposits are quickly reduced to a thin layer of ash, which can then be simply wiped away with a damp cloth to leave a completely clean oven. No need for detergents or back strain – nothing could be easier.

LED clock / automatic programmer

With easy-to-read displays and clear button layout, setting cooking duration or end-time is a breeze, while the electronic clock also serves as a minute-minder, and an acoustic signal indicates that cooking time is complete. The beautifully designed control panel on electronic models clearly displays cooking programme and current temperature information, allows for precise temperature selection, and makes programming the multi-function oven as easy as 1-2-3.

Easyclean door

On all our freestanding cookers, the all-glass inner door has no joints or screws, which not only looks great but is also extremely easy to clean. If required, the complete door can be quickly and easily removed to provide unrestricted access to the oven interior for cleaning.

Safety

Safer touch door

Bosch oven doors are either double or triple glazed depending on the model, and ensure that the temperature of the door is always well within safety standards.

Safety lock

Simply press the lock key for 4 seconds to disable all functions.

Automatic switch off function

For extra peace of mind, if left unattended, the cooker will switch off after a specific period of time. This additional safety feature is only available on selected models.

Temperature	Switch-off after
20-120°C	24 hours
121-200°C	6 hours
201-250°C	3 hours
251-300°C	2 hours

Accessories

Fully extendable shelf rails

The height of convenience, telescopic shelf rails allow you to pull out the oven shelves to access an item without having to lift it out of the oven. Ideal for basting or tasting quickly and safely, each set is supplied with rails for three shelf levels (HEZ338305).

Deep pan

The extra deep large pan has a capacity of 10 litres and is ideal for grilling or roasting on a big scale (HEZ333000).

Cookers – hob features and benefits.

Performance

Induction cooking – for efficiency

Induction technology is widely recognised as one of the quickest, safest and most efficient methods of cooking available. An induction hob cooks almost twice as quickly as a standard ceramic hob, and 40% quicker than gas.

Ceramic hobs

With their electronic touch controls and flexible cooking zones, our ceramic hobtop freestanding cookers combine great looks with smart function and design. The smooth ceramic glass surface of our ceramic hobs is durable and heat resistant as well as being practical and easy to clean.

Dual ring cook zone

Available on selected ceramic hobs, this energy-saving feature allows you to select a smaller cook zone for small pans, and a larger zone for larger pans.

Induction hobs

Induction technology is now widely recognised as one of the quickest, safest and most efficient methods of cooking available. It uses an electromagnetic field to instantly generate heat, giving you the control and responsiveness of gas, but with far more energy efficiency. Heat is only generated when the pan is placed on the hob – it stops as soon as the pan is removed – and while an induction hob cooks almost twice as quickly as a standard ceramic hob, and 40% quicker than gas, the ceramic glass of an induction hob does not get as hot as that of standard ceramic hobs, which makes for a safe and easy-to-clean cooking surface. The hob will only operate with pans with a ferrous (or magnetic) base.

Boost function

For additional cooking power just when you need it, for instance when stir-fry cooking or boiling water for pasta, the Boost function on our induction hob models increases the power output of the selected cooking zone by approximately 50% by “borrowing” power from another zone.

Convenience

Touch controls / digital display

Our ergonomic hob design features touch-sensitive controls and an LED digital readout informing you of which cook zones are in use and their current power settings, all conveniently located on the hob-top, rather than on the oven fascia, for easy viewing.

Induction hobs – wipe-away clean

As the ceramic glass of an induction hob does not get as hot as a standard ceramic hob, any splashes or spillages that occur will not burn onto the hob top and can be easily and quickly wiped away.

Safety

Induction cooking – for safety

Heat is only created when the pan is placed on an induction hob, and stops as soon as it is removed. In addition, heat is directly transmitted to the pan so the surface temperature of the cooking area is significantly lower than with standard ceramic hobs.

2-stage residual heat display

Ceramic and induction hobs feature a display of the residual heat remaining after a cooking zone has been turned off. 'H' indicates that the residual heat is sufficient to finish off cooking or to keep items warm, while 'h' indicates that the residual heat is insufficient to cook, but that the zone is still hot enough for caution.

Safety lock

Featured as standard on all touch control models, it prevents the hob from being inadvertently operated.

Accessories

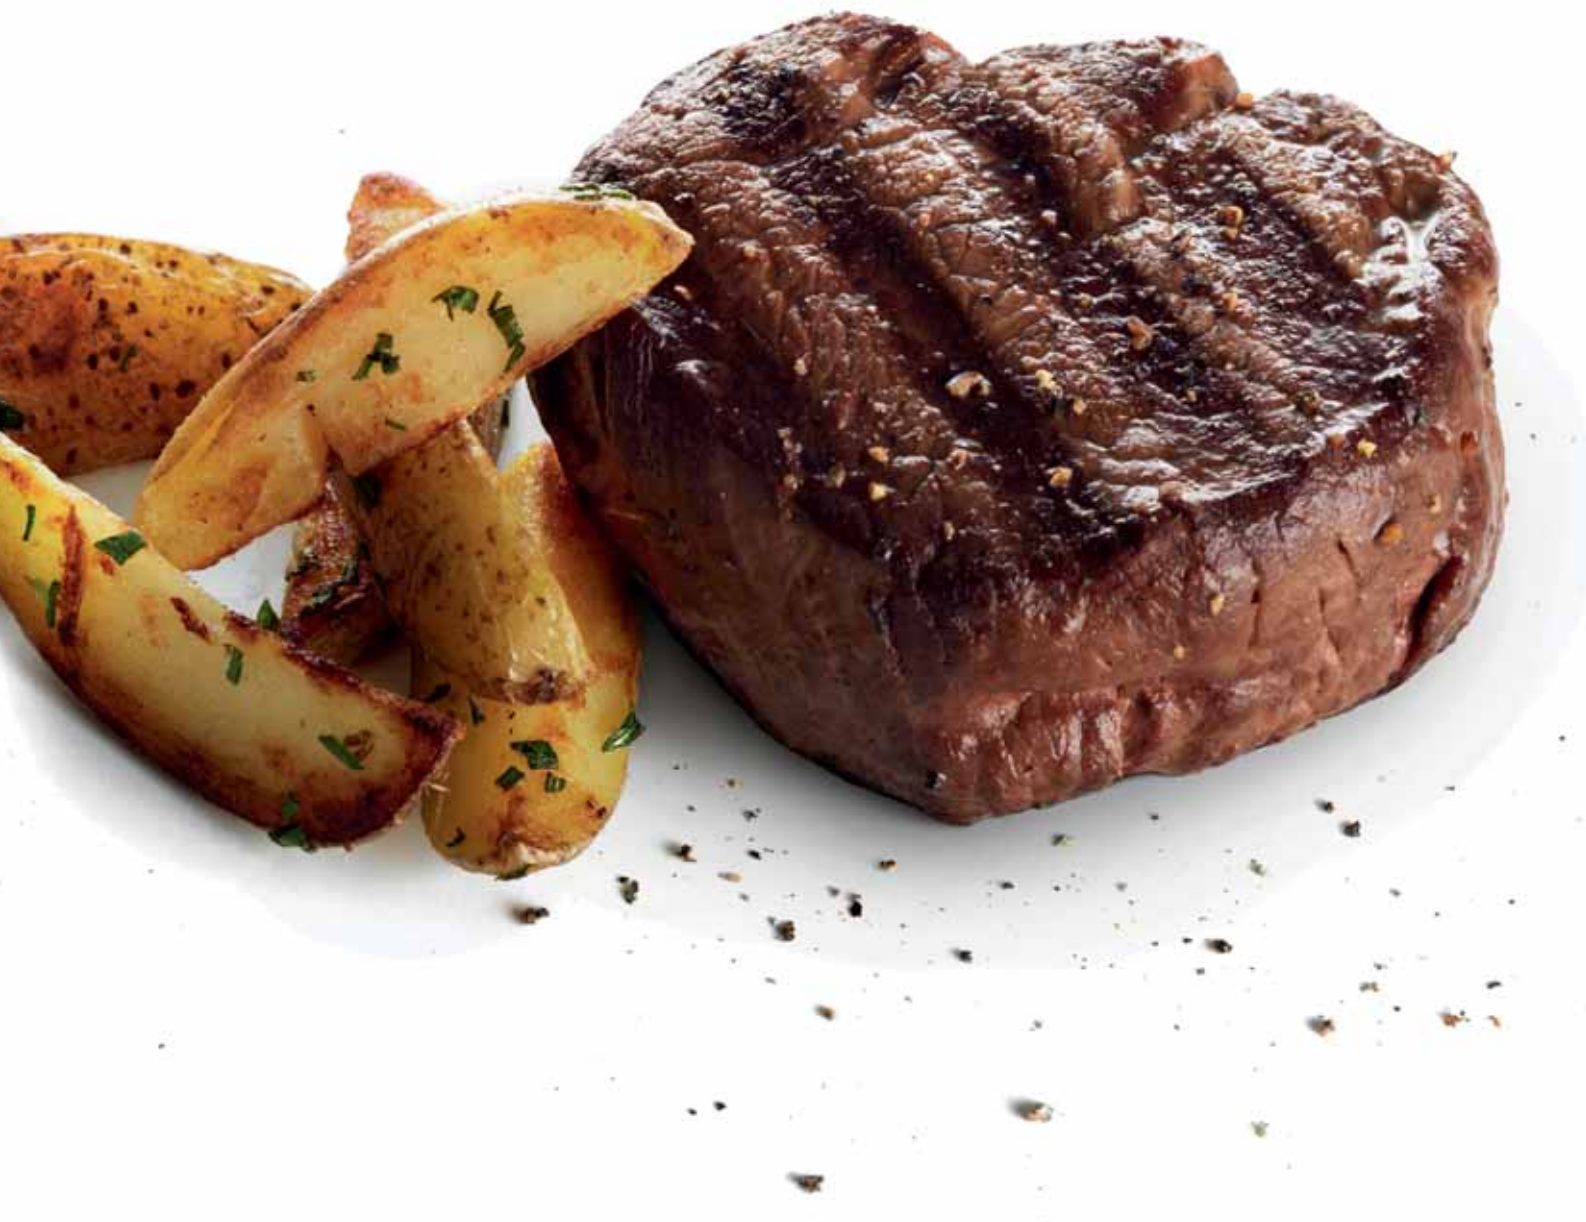

Induction saucepans

We sell a range of Bosch induction saucepans specially tested to ensure optimum performance with Bosch hobs via your retailer or our online shop (HEZ390040).

Visit www.boschappliances.co.uk for further details.

The ultimate cook's companion.

With multifunction electronic controls, 60 litre oven capacity, sleek lines and classic brushed steel finish, the top-of-the range Bosch freestanding cooker does more than just cook. Brimming with mouth-watering features, from the state-of-the-art 4-zone induction hob with automatic pan recognition, to the multifunction oven with pyrolytic self-cleaning, it will satisfy even the most demanding cooks. And an A energy efficiency rating means it's kind on the environment too.

Logixx freestanding electronic multifunction cooker

HLN658250B brushed steel

- Freestanding cooker with integral grill
- 4-zone induction hob with electronic touch controls
- Pyrolytic cleaning system
- Automatic pot roast programmes
- Fast heat
- Bar handle and centralised LED display panel / controls
- LED clock and automatic programmer
- Automatic switch off function
- Extra large 60 litre oven capacity with 5 shelf positions
- Pop-out controls for oven
- 2-stage residual heat indicator for each induction zone
- Automatic pan recognition
- Safety lock
- Interior light
- Large viewing window
- Full glass inner door
- Triple glazed door
- Storage drawer

Oven – 8 cooking functions:

Standard accessories:

- 2 wire shelves
- Enamel roasting/grill pan with grill pan insert

Optional accessories:

- Extra deep roasting/grill pan HEZ333000
- 4-piece induction pan set HEZ390040

Pyrolytic self-cleaning function.

The ultimate in self-cleaning power and convenience. In a pyrolytic self-cleaning cycle, the oven is heated to approx. 480°C. At that temperature, any deposits are quickly reduced to a thin layer of ash, which can be wiped away with a damp cloth to leave a completely clean oven. No need for detergents or back strain – nothing could be easier. Pyrolytic cleaning is available on selected models: HLN658250B and HLN653250B

Logixx freestanding electronic multifunction cooker

HLN653250B brushed steel

- Freestanding cooker with integral grill
- 4-zone ceramic hob
- Pyrolytic cleaning system
- Automatic pot roast programmes
- Fast heat
- LED clock and automatic programmer
- Automatic switch off function
- Extra large 60 litre oven capacity with 5 shelf positions
- Bar handle
- Pop-out controls for oven and hob
- Residual heat indicator for each hob zone
- Dual ring cook zone – saving energy when using smaller pans
- Safety lock
- Interior light
- Large viewing window
- Full glass inner door
- Triple glazed door
- Storage drawer

Oven – 8 cooking functions:

Standard accessories:

- 2 wire shelves
- Enamel roasting/grill pan with grill pan insert

Optional accessories:

- Extra deep roasting/grill pan HEZ333000

Induction cooking – the ultimate cooking experience.

An electromagnetic field instantly generates heat, **giving the control and responsiveness of gas, but with far more energy efficiency.** While an induction hob cooks almost twice as quickly as a standard ceramic hob, the ceramic glass does not get as hot, which makes for a safe and easy-to-clean cooking surface.

Logixx freestanding electric multifunction cooker

HLN448250B brushed steel

- Freestanding cooker with integral grill
- 4-zone induction hob with electronic touch controls
- Automatic Oxylytic cleaning programme – roof, back and side liners
- Fast heat
- Bar handle and centralised LED display panel / controls
- LED clock and automatic programmer
- Automatic switch off function
- Large 58 litre oven capacity with 5 shelf positions
- Pop-out controls for oven
- 2-stage residual heat indicators for each induction zone
- Automatic pan recognition
- Safety lock
- Interior light
- Large viewing window
- Full glass inner door
- Double glazed door

Oven – 8 cooking functions:

Standard accessories:

- 2 wire shelves
- Enamel roasting/grill pan with grill pan insert

Optional accessories:

- Telescopic shelf rails HEZ338305
- Extra deep roasting/grill pan HEZ333000
- 4-piece induction pan set HEZ390040

Exxcel freestanding electric multifunction cooker
HLN343250B brushed steel
HLN343260B black

- Freestanding cooker with integral grill
- 4-zone ceramic hob
- Automatic Oxylytic cleaning programme – roof, back and side liners
- LED clock and automatic programmer
- Large 58 litre oven capacity with 5 shelf positions
- Bar handle
- Pop-out controls for oven and hob
- Residual heat indicator for each hob zone
- Dual ring cook zone – saving energy when using smaller pans
- Safety lock
- Interior light
- Large viewing window
- Full glass inner door
- Double glazed door
- Storage drawer

Oven – 7 cooking functions:

Standard accessories:

- 2 wire shelves
- Enamel roasting/grill pan with grill pan insert

Optional accessories:

- Telescopic shelf rails HEZ338305
- Extra deep roasting/grill pan HEZ333000

Classixx freestanding electric multifunction cooker

HLN342222B white

HLN342250B brushed steel

- Freestanding cooker with integral grill
- 4-zone ceramic hob
- LED clock and automatic programmer
- Large 58 litre oven capacity with 5 shelf positions
- Bar handle
- Fixed controls for oven and hob
- Residual heat indicator for each hob zone
- Safety lock
- Interior light
- Large viewing window
- Full glass inner door
- Double glazed door
- Storage drawer

Oven – 7 cooking functions:

Standard accessories:

- 2 wire shelves
- Enamel roasting/grill pan with grill pan insert

Optional accessories:

- Telescopic shelf rails HEZ338305
- Extra deep roasting/grill pan HEZ333000

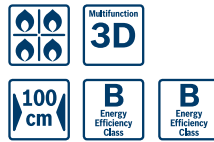

Range cookers.

Our beautiful state-of-the-art range cookers will provide a focal point for any kitchen, whether slot in or stand-alone.

Multifunction double range cooker

HSB745A55E brushed steel

- Double electric oven, 83 litre total capacity, with 5 burner gas hob
- LED clock and automatic timer
- U-shape door design with angular bar handle
- Fixed controls
- Integral cooling fans
- Triple glazed drop down doors
- Storage compartment

5 burner gas hob

- 1 high speed wok burner
- 1 high speed burner
- 2 standard burners
- 1 economy burner
- 3 piece cast iron pan supports
- Flame failure device
- LPG jets included

Main oven – 7 cooking functions:

- 52 litre capacity
- 5 shelf positions
- Interior light

Secondary oven – 4 cooking functions:

- 31 litre capacity
- 5 shelf positions
- Interior light

Standard accessories:

- Full width enamelled baking tray in each oven
- Small pan trivet support

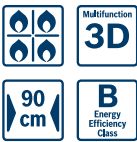

Optional accessories:

Brushed steel back panel HEZ745100

Multifunction range cooker

HSB745055E brushed steel

- Extra large cavity 81 litre electric oven with 5 burner gas hob
- LED clock and automatic timer
- U-shape door design with angular bar handle
- Fixed controls
- Integral cooling fan
- Triple glazed drop down door
- Storage compartment
- Interior light

5 burner gas hob

- 1 high speed wok burner
- 1 high speed burner
- 2 standard burners
- 1 economy burner
- 3 piece cast iron pan supports
- Flame failure device
- LPG jets included

Main oven – 7 cooking functions:

Standard accessories:

- Full width enamelled baking tray in each oven
- Small pan trivet support

Optional accessories:

- Brushed steel back panel HEZ745090

Microwaves.

Even though these days our busy lives often seem to leave less and less time for cooking, **we still want to be able to eat tasty, healthy food.** With a Bosch freestanding microwave, it is possible to put good food on the table – fast.

Automatic weight programme

Press the programme button, select the programme number and enter the weight. The oven will automatically calculate the optimum power and time required to cook or defrost your dish to perfection.

Under cabinet installation

Selected Bosch freestanding microwaves can optionally be mounted neatly underneath a kitchen wall cabinet, allowing convenient access while preserving precious worktop space. (Models HMT75M451/461B and HMT72M450B)

Memory function

Store your favourite recipe instructions, then simply press the memo button to repeat the sequence any time.

Integral grill

Bosch brings you the best of both worlds, with an integral 1000W quartz grill and microwave/grill combination programmes on selected models. So you can enjoy all the benefits of fast microwave cooking, without sacrificing the delicious browned crispiness you only get with a traditional grill.

Microwave

- HMT75M451 brushed steel**
- HMT75M461 black**

- 17 litre capacity (0.6 cu.ft.) freestanding microwave with electronic controls
- Designed to complement the Bosch freestanding cooker range
- 245mm diameter glass turntable
- LED display for microwave power level, cooking duration and 24 hour clock
- Electronic timer (up to 99 minutes)
- Push button controls for selecting power levels
- Retractable rotary control for timer and weight settings
- 5 power levels: 90/180/360/600/800W
- 4 weight automatic defrost programmes
- 3 weight automatic cooking programmes
- Memory function
- Can be installed under a wall unit

Microwave with integral grill

- HMT75G451 brushed steel**

- 17 litre capacity (0.6 cu.ft.) freestanding microwave with electronic controls and integral 1000W quartz grill
- Designed to complement the Bosch freestanding cooker range
- 245mm diameter glass turntable
- LED display for microwave power level, cooking duration and 24 hour clock
- Electronic timer (up to 99 minutes)
- Push button controls for selecting power levels
- Retractable rotary control for timer and weight settings
- 5 power levels: 90/180/360/600/800W
- 1000W quartz grill function
- 4 weight automatic defrost programmes
- 3 weight automatic cooking programmes
- 1 weight combination cooking programme
- Memory function
- Wire grid supplied

Microwave

HMT72M450 brushed steel

- 17 litre capacity (0.6 cu.ft.) freestanding microwave
- Designed to complement the Bosch freestanding cooker range
- 245mm diameter glass turntable
- Timer (up to 60 minutes)
- Retractable rotary controls for power level and timer settings
- 5 power levels: 90/180/360/600/800W
- Interior light
- Can be installed under a wall unit

Microwave with integral grill

HMT75G450 brushed steel

- 17 litre capacity (0.6 cu.ft.) freestanding microwave with integral 1000W quartz grill
- Designed to complement the Bosch freestanding cooker range
- 245mm diameter glass turntable
- Timer (up to 60 minutes)
- Rotary controls for power level and timer settings
- 5 power levels: 90/180/360/600/800W
- 1000W quartz grill function
- 2 microwave/grill combination programmes
- Interior light
- Wire grid supplied

Bosch customer service.

The quality of our appliances is superb.

However we realise that components do occasionally fail which is why we set great store by the quality of our after sales service.

All Bosch appliances come with a full two years' warranty (to take advantage of the second year the appliance guarantee card must be returned to us). This warranty can be extended for a further three years (total 5 years) with a Breakdown Protection Plan which covers parts, labour and call out charges for an unlimited number of breakdown repairs and also extends your warranty to include accidental damage.

After sales service is provided by BSH Appliance Care, one of the most efficiently run computer-controlled nationwide networks in the UK, who can normally send a Bosch service engineer to you within two days of your call. Service vans hold a large stock of spare parts on board and over 97% of all functional parts are immediately available from stock. In the rare event that a part is not in stock, a computer link to the German spares operation in Munich ensures that it will be ordered without delay. If an appliance is discontinued, we guarantee that the major components will still be available for at least 10 years.

For any queries about your Bosch appliance, please call our product advice department at BSH Appliance Care on 0844 892 8925.

For queries relating to cover please call our 24 hour helpline on 08706 000535. They will be more than happy to help you.
